

With decades of experience in the instrumentation industry, Takahe Analytical Instruments is a leading and trusted name in the field of sample preparation instrumentation in India. Backed by technological expertise and a rich service experience, our company is a manufacturer of a range of sample preparation instruments from Nitrogen Evaporators, Solid Phase Extraction Positive pressure as well as negative pressure, Multitube Vortexers, Mixers, Shakers, and Incubator Shakers. Takahe also manufactures the SpeedoVap LX nitrogen evaporator efficient, easy to install and easy to use.

Easy and Simple way to Evaporate

Our LX Series nitrogen evaporator is designed for evaporation of samples in a fast and efficient manner. The LX series is simple to operate, and the installation is very easy. It uses a vortex shearing technology to evaporate samples. Specifically designed for Fisheries, Educational Institutions, Food and Environmental testing labs. We have a large installation base and provide the fastest after sales service in the industry.

Product Features

- Made of rust proof aluminium
- Wetted part made of stainless steel
- Interchangeable racks for test tubes
- Maintenance Free
- Available with compliance documents
- Easy Installation and operation

Product Specifications

Number of Samples	30/50
Number of Stations	3/5
Timer	99 Minutes
Temperature	Ambient - 99° C
Alarms	Visual - Over Temperature
Electric Requirement	230 V 50 Hz Single Phase 3 Amps
Compliance Documents	Included
Dimension LXWXD	55 cm X 36 cm X 33 cm
Product Weight	18 Kgs

- Specifications may be changed for design considerations.
